

Sealing projects got you

STUCK?

Eliminate the STICK with DETACK

Open freshly crack- sealed pavements to vehicle and pedestrian traffic immediately and eliminate sealant pick-up and tracking with DETACK. DETACK is an economical, biodegradable liquid from Crafco that eliminates sealant tack when sprayed onto freshly applied hot pour sealant. Now you don't have to wait until the sealant has cooled before opening the pavement to traffic. DETACK application is a one-man operation that saves money, time, and increases efficiency. DETACK is the smart choice over messy sand, aggregate, or toilet paper applications and reduces set up and tear down time for lane closures. If you're stuck for an economical, time saving, detackifying solution for hot pour sealant then DETACK from Crafco is your answer.

Crafco Pavement Cutters

The patented clutch design of the Crafco Model 200 Pavement Cutter allows you to follow even the narrowest random crack. No other pavement cutter on the market today can compare to Crafco's quality, reliability, and long term performance. Prepare pavement cracks the right way, use the Crafco Model 200 Pavement Cutter.

Crafco Melter/Applicators

Crafco Super Shot and E-Z Pour melters are the most efficient, most productive, safest and easiest to use melter/applicators available today. Crafco has a wide variety of melters that will suit any demand. Whether it's a small parking lot application or a large highway project, Crafco has a melter just right for the task.

Crafco Sealants

Crafco sealants include Asphalt Rubber, Polyflex, RoadSaver, Superflex, SuperSeal, and Silicone Sealants. Whatever the task or pavement sealing challenge you may have, Crafco has a sealant for your application. Applications include: parking lots, highways, canals, sloped surfaces, pedestrian areas, and other custom applications. If Crafco doesn't have it no one will.
