

# Super Shot Melters

*Choose your size, choose your options!  
Personalize your unit.*

The Crafcro Super Shot series melter/applifiers represents the most technologically advanced melter/applifiers available. These state-of-the-art machines offer the ultimate in efficiency and ease of use. The digital control features of this equipment accurately controls and regulates the heating temperature of the sealant and transfer oil. The patented internal pumping system requires no clean out and features a hydraulic flow rate adjustment. There are no valves, fewer moving parts and no hose pressure build up with this state-of-the-art design. Super Shot melters will out-perform any comparable sized machine available. Crafcro offers a one-year warranty, more options, and greater safety, making these machines the greatest value with the highest productivity of any melter. The Crafcro Super Shot Melters are the most efficient and easy to use melter/applifiers available today!

## Three sizes to choose from

Super Shot 60

Super Shot 125  
w/ optional compressor

Super Shot 250 w/engine cover

There are three sizes to choose from. The Super Shot 60 is a 60-gallon capacity unit, which features automatic digital controls. It is propane fired, with a heated hose and wand. This machine is designed for used on projects under 2,000 pounds of sealant per day. The Super Shot 60 is also available as a skid mount.

The mid-sized 125 gallon capacity Super Shot 125 offers the best versatility. Ideal for mid to large sized projects, this unit is diesel powered available with an optional compressor or a labor saving Auto Loader.

The oversized 250-gallon SS250 is designed for large projects. This machine will out-perform any melter in its class and is available with many standard options.

## Additional Crafcro Products

**Crack and Joint Sealant**  
Crafcro formulates a wide variety of joint and crack sealants that meet and exceed Federal and State specifications. All Crafcro Sealants are guaranteed from start to finish. Crafcro has the broadest line of sealant in the industry making Crafcro your "one-stop shop" for all your sealant requirements. With four manufacturing facilities across the United States Crafcro guarantees efficient and timely shipping, supplying customers with product on-time, every time.

**Pavement Joint Adhesive**  
Crafcro Joint Adhesive is a unique polymerized asphalt product that is applied to the longitudinal cold joint interface between hot mix asphalt paving passes. A thin layer applied to the interface bonds less dense or segregated material together and waterproofs the joint apex, which prevents raveling and crack formation.

**Spray Injection Patcher**  
The Crafcro Spray Injection Patchers are the most cost effective repair systems for pothole repair today. Distressed pavements are cleaned, tack coated, and filled in minutes by one continuous operation. This system can be used year round and is an ideal addition to your pavement preservation system.

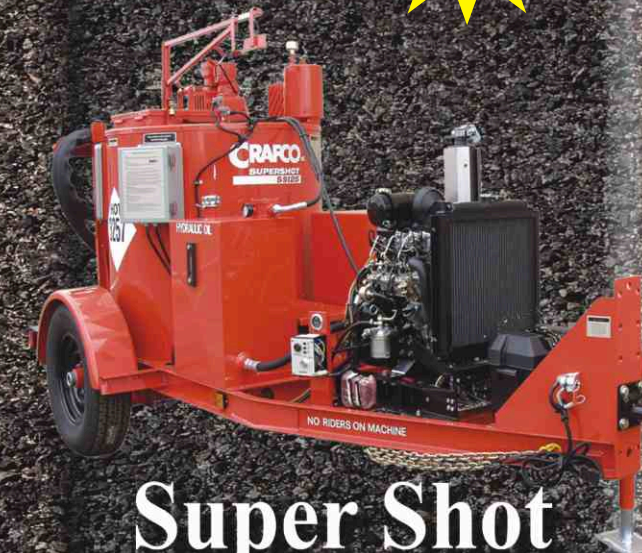

**PolyPatch**  
Crafcro PolyPatch is a unique blend of polymer modified asphalt and select aggregate specifically designed for repairing pavement distresses too large for crack sealing and too small for re-paving.

**Loop Sealant**  
Crafcro Loop Sealant is widely accepted for use in sealing traffic intersection loop detectors. Crafcro Loop Sealant provides 100% encapsulation of the sensor wires. Applicator equipment also available.

**Marker Adhesive**  
Both Crafcro Standard and Flexible Marker Adhesive materials assure marker buttons and lane reflectors stay where they are placed. Standard and Flexible Marker Adhesives are hot-applied bituminous based products that are accepted worldwide. Applicator equipment also available.

**Roofing & Waterproofing**  
Crafcro supplies a variety of bulk and packaged asphalt material used in the production of asphalt shingles, in the construction of built up roofing systems and for structural waterproofing. Applicator equipment also available.

**TechCrete**  
Crafcro TechCrete is the flexible solution for concrete repair and is a proven hot pour repair that is different from all conventional rigid repair methods. Once in place TechCrete will move with the pavement and will not de-bond or crack. With Crafcro TechCrete its a one time fix.

- Over 25 years of proven performance
- Most comprehensive distribution and service coverage
- Most available options

U.S. Patent #4,859,073

## Superior Pump Technology

### Longer Pump Life • Efficient and Aggressive Agitation

The patented pump technology of the Crafcro Super Shot melters is what makes the Super Shot the most productive and lowest maintenance melter in the industry. The Crafcro patented pump is mounted inside the melter. Mounting the pump inside the melter achieves a number of key goals. These goals are; eliminating material re-circulation, eliminating outside plumbing and high-pressure lines while decreasing pump wear. By eliminating the need for re-circulation the pump runs only when material application is needed making this an "on-demand" system. Conventional pumps run continuously re-circulating material constantly during operation causing premature wear to the pump shortening its life. The life of the Super Shot melter pump will last many times longer than convention pumps.

The on-demand system increases operator safety with the elimination of high-pressure lines that can fail while increasing productivity and heat-up time. Because the pump is mounted internally the pump requires no packing that can leak eliminating the continual packing maintenance that is required with conventional pumps. Less maintenance in the shop means more production on the job, more profit and less costs.

Pump replacement when needed takes less than three hours, getting you back at what is important. The Crafcro patented pump technology will prove to be productive and profitable for you while continuing to keep the Super Shot melter the industry leader.

### FEATURES:

- 60, 125, and 250 gallon capacity
- Automated control system
- No line pressure
- 45 minute heat-up time
- No external plumbing
- No-re-circulating
- Fewer moving parts
- Direct flow application
- "At-tip" variable temperature control
- Digital temperature read-out
- Variable flow hydraulics
- Low fuel consumption
- No valves
- Longer pump life

### OPTIONS:

- Auto loader
- Compressor
- Router carrier
- Hitch selection
- Tail light plug selection
- Tool box
- Sealant tips and nozzles
- Custom paint
- Fire extinguisher
- Cab brake control
- Overnight heater
- Light bar
- Spare tire

### LOW VOLTAGE ELECTRICALLY HEATED HOSE -

The hose is heated with low electric voltage to application temperature within 45 minutes. This means no more hose plug-ups or need to regulate the temperature in an oven compartment. The hose has the longest working radius in the industry and a 360° swivel, protected, repairable hose and wand. Hose has a one year warranty.

# Super Shot Melters built to last!

**AUTOMATIC AGITATOR SHUT-OFF and SPLASH PROOF LID** Safety is engineered in. Shut offs are incorporated into:

- the lid
- the hose
- the wand
- the pump
- the burner
- the electrical controls

**INTEGRATED OPERATOR CONTROL SYSTEM** operates the entire unit and overrides possible operator error. Set it and forget it.

**ROUND TANK** configuration provides consistent clearance between the agitator and tank wall for complete agitation. Featuring a .187" wall thickness for lasting durability.

**OPTIONAL COMPRESSOR** available for over ten years runs air lance used to clean out dirt and debris from cracks increasing crack sealing efficiency.

**NO VALVES IN MATERIAL LINE** - The Super Shot utilizes a unique design that provides for no valve obstructions from the pump all the way to the tip of the wand. No valves means easier operation and no pressure in the lines.

**QUICK AND SIMPLE START UP** - With the flip of a toggle switch the Super Shot will be ready to operate in less than an hour. Shut down at the end of the day is just as easy.

**EFFICIENT BURNER** is positioned safely within the frame giving it protection and ample ground clearance. Time saving electric overnight pre-heater option available.

**OPTIONAL ENGINE COVER** protect engine from the elements, vandalism and theft.

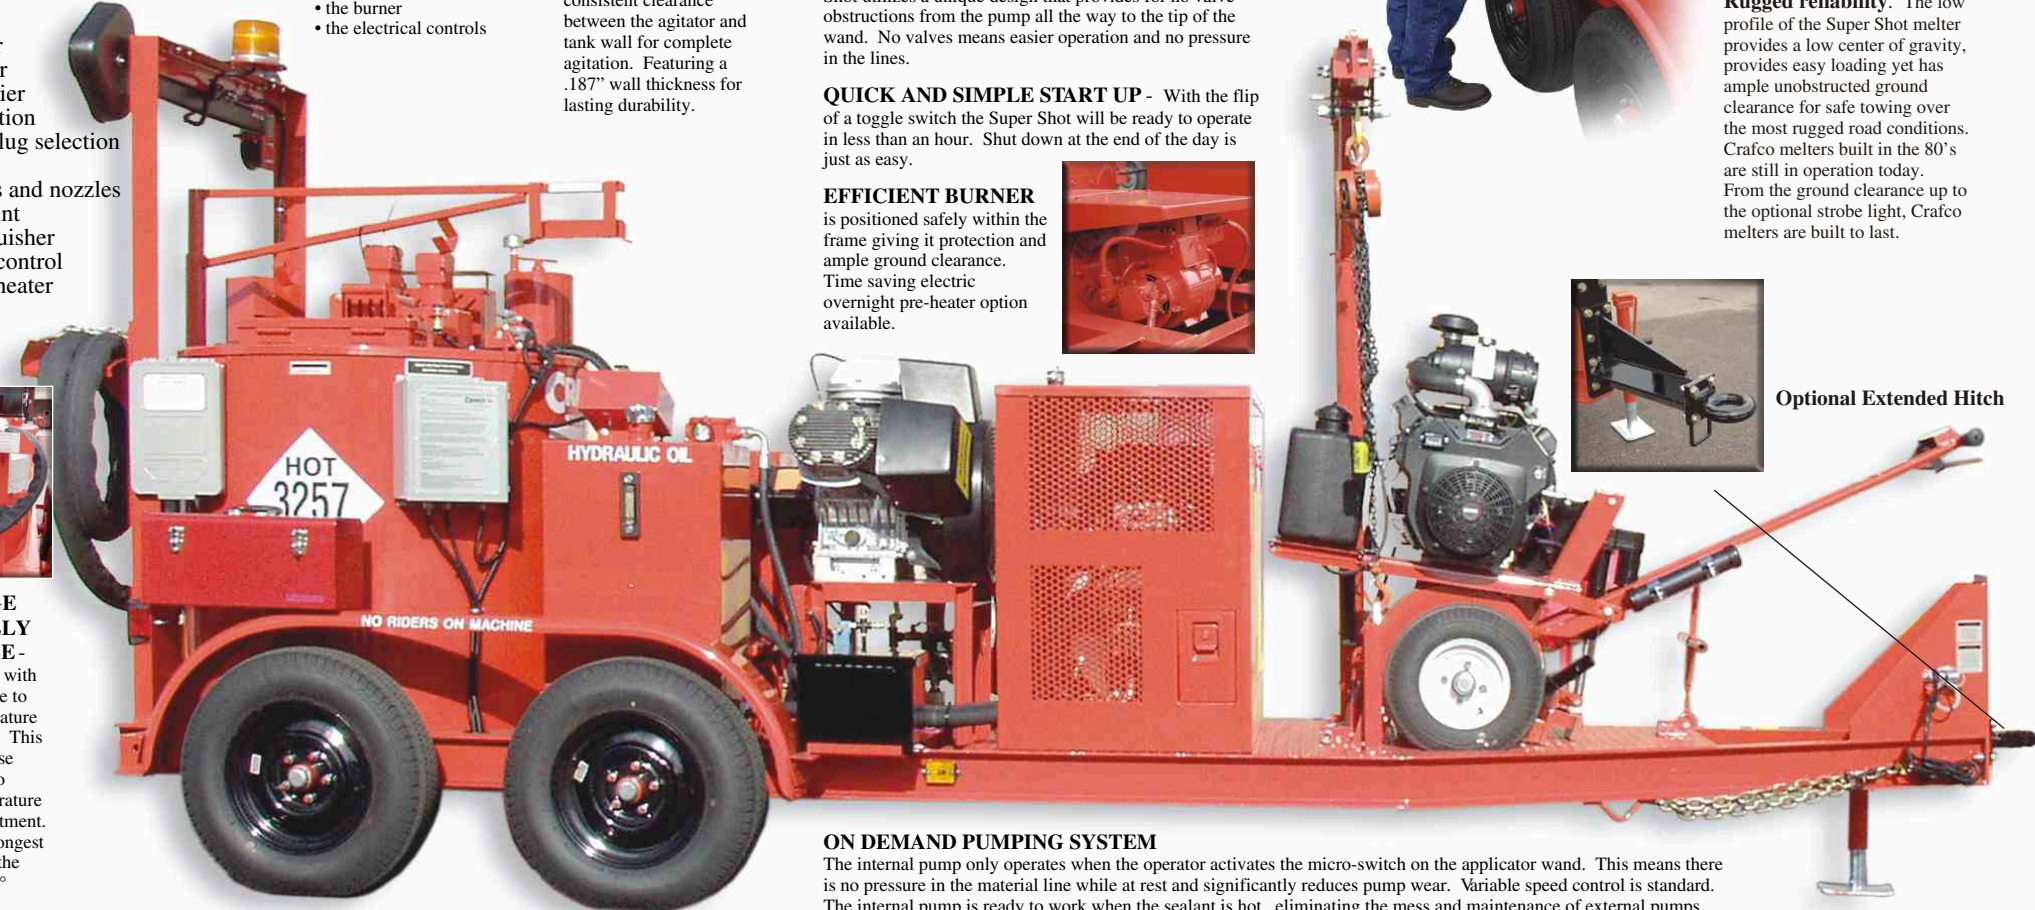

### Ergonomically engineered loading height features:

- Splash proof lid
- Automatic agitation shut off
- Fume free environment
- No operator back strain
- Light weight loading lid

**Rugged reliability.** The low profile of the Super Shot melter provides a low center of gravity, provides easy loading yet has ample unobstructed ground clearance for safe towing over the most rugged road conditions. Crafcro melters built in the 80's are still in operation today. From the ground clearance up to the optional strobe light, Crafcro melters are built to last.

Optional Extended Hitch

### ON DEMAND PUMPING SYSTEM

The internal pump only operates when the operator activates the micro-switch on the applicator wand. This means there is no pressure in the material line while at rest and significantly reduces pump wear. Variable speed control is standard. The internal pump is ready to work when the sealant is hot, eliminating the mess and maintenance of external pumps.

*The safest and most technologically advanced crack sealing melter on the market today.*
